

LOUISSE DOMINIQUE BERTILLO

Metro Manila, Philippines • loussebertillo2004@gmail.com • <https://lousse-portfolio.vercel.app/>

SUMMARY

Results-oriented Senior Web Developer & Full-Stack Engineer specializing in modern frontend architecture (Next.js, React, TypeScript), custom Advanced Shopify Development, and operational automation (n8n, Zapier, Claude). Proven track record of bridging engineering and business growth, directly driving a 170% increase in online sales and building real-time architectures that scale to thousands of active users. Expert at eliminating organizational bottlenecks through intelligent workflow integration and AI-assisted automation pipelines.

WORK EXPERIENCE

Senior Web Developer | ISSY Cosmetics

May 2026 – Present

- Operational Automation: Designed and deployed scalable, multi-step integration pipelines using n8n and Zapier to eliminate structural bottlenecks and connect disparate office systems.
- AI Integration: Integrated Claude and AI-assisted workflows to automate complex data extraction and intelligent back-office decision-making.
- Efficiency Optimization: Built automated customer service systems that drastically reduced response times and improved overall workflow efficiency to support company growth.

Web Developer | ISSY Cosmetics

September 2025 – May 2026

- E-Commerce Growth: Spearheaded advanced, conversion-focused Shopify development and desktop/mobile optimization, directly driving a 170% increase in online sales.
- Interactive Campaigns: Engineered custom modular layouts and real-time web games using modern frontend technologies to maximize user acquisition and retention.
- Scalable Engineering: Maintained and optimized the live production platform, ensuring high performance, fast loading speeds, and seamless user experiences.

Full Stack Developer | Meridian Auctions

January 2026 – March 2026

- Engineering Leadership: Led full-stack development for a high-traffic live auction platform, managing frontend architecture, backend systems, and database optimization.
- Team Mentorship: Supervised and mentored a team of three developers, establishing code quality standards and ensuring robust, reliable deployment cycles.
- System Reliability: Engineered a real-time, highly reliable transaction-handling architecture to eliminate latency and ensure data consistency during peak concurrent user traffic.

PROJECTS

Fruit Jam | Creator & Lead Developer

- Scalable Architecture: Engineered and launched an interactive browser-based game that successfully scaled to 3.4k active players within 3 days of launch.
- High-Traffic Performance: Optimized real-time database queries and frontend state management to seamlessly handle massive concurrent request volumes with zero latency.

La Fleur | Web Developer

- E-Commerce Optimization: Engineered a polished custom storefront featuring enhanced product presentation, optimized user journeys, and seamless add-to-cart workflows.
- Conversion Focus: Implemented strategic visual hierarchy and trust cues, directly driving higher customer conversion rates and reducing checkout drop-offs.

QC Weather Hub | Web Developer

- Performance Optimization: Engineered a responsive, location-aware weather dashboard utilizing lightweight API fetching to deliver fast access to real-time forecast data.
- User Experience: Designed an intuitive, clutter-free user interface that optimized data rendering and significantly reduced mobile load times.

TECH STACK

- Frontend:** Next.js, React, TypeScript, JavaScript, Tailwind CSS, Responsive Design, Framer Motion, Web Game Development
- Backend:** PHP, MySQL, Supabase, REST API, EmailJS, Auth0
- Platforms:** Shopify (Advanced Development & Custom Modular Sections), WordPress, Squarespace, Webflow
- Automation & AI:** n8n, Zapier, Claude, Trae, Prompt Engineering, Workflow Automation, AI-Assisted Operations, Customer Support Automation
- Design Tools:** Figma, Framer, Canva
- Development & Infrastructure:** GitHub, Vercel, Cloudflare, Google Cloud Console, ESLint, PostCSS

EDUCATION

ACCESS COMPUTER COLLEGE

2022 - 2025

- Bachelor of Science in Information Technology
- GWA: 92.48
